Drawings

1. The drawings have been objected to by the draftsman, please see PTO-948 for the required corrections. Accordingly, new drawings are required in reply to this Office action.

Claim Rejections - 35 USC § 112

2. The rejection of the claims under the first paragraph of 35 U.S.C. 112 has been withdrawn.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. As to claim 3, this is an omnibus type claim, and the rejection is being maintained.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-30, re rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gasser et al., U.S. Pat. No. 5,220,604, hereinafter '604.

7. As per claims 1-30, '604 substantially teaches a method and system for performing group exclusion in hierarchical group structures comprising: obtaining proof of group membership, requesting certificate (cert) membership, determining means,

issuing group membership certificates, making a dynamic decision, a second group member-ship, group membership cert., group membership lists, and providing requester proof of membership and similarly non-group cert. and memberships, new cert. issued at runtime. (figs. 1c, 3-4, 10-12, abs., col. 2, lines 15-40 et seq., col. 2, lines 65-68 et seq., col. 3, lines 1-5 et seq., 15-20, 45-68, col. 7-8, col. 4, lines 41-55 et seq., col. 7, lines 60-65 et seq., col. 8, lines 55 et seq., col. 10, lines 60-65 et seq., col. 11, lines 9-15, 25-35, col. 12, col. 13, lines 50-67 et seq., col. 14, line 1-67, col. 15, lines 5-10, and 30-39, col. 17, lines 60-65, col. 18, col. 19, lines 35-68, cols. 20 et seq., col. 15, lines 59-65 et seq. and claims 1-3).

8. Claims 31-54, recite a concomitance of the previously recited and rejected claim features, and thus fails to distinguish over the rejected claims 1-30. Accordingly, they are rejected upon the same rationale; see above for the specifics of the rejection.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 55-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gasser et al., U.S. Pat. No. 5,220,604, hereinafter '604 as applied to rejected claims 1-54 above.

Art Unit: 2134

11. As to claims 55-66, they distinguish over the rejected claims 1-54 by embodying the invention as a carrier wave for causing the computer to perform a sequence of instructions. The examiner takes official notice of both the motivation and the modification needed to perform the invention of '604 in a wireless network. One of ordinary skill in the art at the time of the invention, would have had a motivation to perform the necessary modifications to integrate the invention in a wireless network by performing the necessary protocols recognition, interfaces and signal generation means to allow one to utilize a distributed wireless network as is the convention in the data processing arts. Moreover, '604 in figure 1C shows that his invention may be utilized in a wireless network as evidenced by the wireless workstations that are connected to his system.

Response to Arguments

12. Applicant's arguments filed 7/22/03 have been fully considered but they are not persuasive. Applicant's remarks that the prior art fails to teach issuing at runtime a new certificate, the examiner does not agree. Applicant is directed to column 15, and the use of session keys for security management of certificates.

Conclusion

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
